

Table 1: Proportions of GMO Food on Japanese Dining Tables

	Proportion of GMO in 2002 crop (1)	Japanese imports (2001)	Japanese self-sufficiency (2001)	Proportion of GMO food on our tables
Corn (USA)	34%	87.6% from USA	0.0%	29.8%
Soy (USA)	75%	75.5% from USA	5.2%	53.7%
Canola (Canada)	64%	81.1% from Canada	0.1%	51.9%
Cottonseed (Australia)	(2) 42%	96.0% from Australia	0.0%	40.3%
Notes:	(1) The area planted to GM crops as a proportion of the total crop area. (2) Australian cottonseed area is data for 2001. Sources: Calculated from USDA and JMAFF statistics			

Table 2: Japan's Reliance on Wheat Imports

Country	Amount (million tons)
Japan's Domestic Production	0.7
USA	3.0
Canada	1.4
Australia	1.1
Note: Data is forecast for year 2000	

Table 3: Results of Consumer Questionnaire Survey

<i>Perception of GM Food</i>	
Good	2.9%
Bad	59.5%
Not sure	35.3
<i>Awareness Concerning GM Food Safety Issue</i>	
Anxiety over unknown harmful effects	71.1%
Vague, general anxiety	16.9%
No different from conventional produce	1.9%
Anticipate great usefulness in the future	5.2%
